ABOUT ME

I'm yohannes a fullstack software developer and I have been building nice looking and secure digital products on the web for over 3 years.with the skills i have gained over those years i can deliver high quality products that meet your needs.

EXPERIENCE

Fullstack Developer & CEO   **Aug 2025 -OCT 2025**

Telechannels

Built a secure escrow marketplace on the TON blockchain that enables users to buy and sell Telegram channels and groups. Facilitated 30+ verified transactions and generated over $850 in revenue as of July 2025, with continuous growth.

Fullstack Intern   **MAY 2025 -JULY 2025**

UNISA Research Management

Developed a comprehensive Django-based research management platform for the University of South Australia. The system integrates with multiple academic APIs to automatically retrieve publication data, enabling detailed analytics and reporting for research groups and authors.

Telegram Mini App Developer   **NOV 2024 - DEC 2024**

Habesha Ring

Created a private telegram mini app and bot using Python and integrated it with a secure local payment gateway (Chapa). Delivered a reliable, automated experience with smooth payment handling.
